```python
# Prompt for extracting [EIS_Word] token
# Build dialogue for each sentence
for sentence in sentences:
    dialogs=[
        [
            {"role": "system", "content": "Always answer within a word."},
            {"role": "user", "content": f"what is the emotion of the sentence: {sentence}"},
        ],
        [
            {"role": "system", "content": "Always answer within a word."},
            {"role": "user", "content": f"what is the intention of the sentence: {sentence}"},
        ],
        [
            {"role": "system", "content": "Always answer within a word."},
            {"role": "user", "content": f"what is the speaking style of the sentence: {sentence}"},
        ],
    ]
```
